

# Overview of all official Magento Modules from Trollweb

## Official documentation for all our Magento modules

Trollweb is a global leader in developing professional Magento modules both to increase sales and to integrate with important 3rd party services. We are developing and maintaining the official Magento modules for many ecommerce service providers like payment service providers, freight suppliers, ERP suppliers and much more. Read the documentation on how our modules are set up and works by navigating in the left menu. Note that most of the modules are documented in English only. This is due to the fact that most modules are used by thousands of Magento store owners all around the world. The modules explicitly made for the Nordic market has in some cases been documented in Norwegian only.

Note that many of our modules are for internal usage towards our clients only, and are not for re-sale, and that these modules might not be listed publicly here. If you cannot find a module you think we might have developed, please drop us an email to [salg@trollweb.no](mailto:salg@trollweb.no) and we'll get back shortly.

If you have a Magento module development request, feel free to send an email to [salg@trollweb.no](mailto:salg@trollweb.no) with more details / specifications and we will get back shortly.
